

Timeless Tradition

North Country Slate
THE HUNDRED YEAR ROOF

“North Country Slate curates slate from the finest quarries in North America”

Naturally North Country

Natural roofing slate has been sheltering humankind from the elements for more than a thousand years. Created by the forces of nature over 500 million years ago, this timeless product continues to be the roof of choice for the world’s most prestigious and treasured buildings.

CURATING THE WORLD’S FINEST SLATE

All North Country slates are quarried from North American slate deposits and meet the most stringent European, U.S., and Canadian production requirements.

Our roofing slate is available in an extensive palette of colors, comprising of a pleasing variation in shade, veining, texture and grain.

Our attention to detail and affinity for selecting only the finest slate has made the North Country Slate name synonymous with timelessness, durability and beauty.

LONG-LASTING ELEGANCE

With North Country’s availability in a range of slate sizes and thicknesses, roofs can be designed with a smooth overall appearance or a rough-hewn texture.

All of our products are backed by our steadfast commitment to quality and service, as our reputation is only measured by our client’s success.

When fixed with non-corroding nails or hooks, our roofing slate has a lifespan of more than 100 years.

“Beauty, above all”

“Your assurance of quality”

Selecting the Right Slate Colors

All North Country slates meet or exceed ASTM requirements as a S-1 rated roofing slate.

NORTH COUNTRY UNFADING BLACK

This smooth, consistent, rich blue/black slate has a slight luster with subtle dark vertical markings. Produced by a single quarry, North America's largest, this renown slate is exclusive to North Country.

NORTH COUNTRY SEMI-WEATHERING VERMONT BLACK

Predominantly black containing shades of medium and dark gray with subtle linear markings across the slate. A percentage of these slates will weather to tones of buff and brown upon exposure to the elements over time.

NORTH COUNTRY SEMI-WEATHERING GRAY/BLACK

Varying shades of gray with numerous inclusions of black and darker gray stripes. A percentage of these slates will weather to tones of buff and brown upon exposure to the elements over time.

NORTH COUNTRY SEMI-WEATHERING GRAY

A rich battleship gray color that deepens over time with some slates being consistently clear gray with small black markings. A percentage of these slates will weather to tones of buff, brown and tan upon exposure to the elements over time.

NORTH COUNTRY UNFADING GRAY

Used to achieve light to medium gray tones with mottled inclusions of darker gray and black. A natural range of battleship gray to gray/green can be expected.

NORTH COUNTRY UNFADING PURPLE

North Country Unfading Purple is striking tones of burgundy set this slate apart to create a bold and timeless selection. A full range of deep purple tones with occasional green inclusions.

“Spotless reputation for reliability”

NORTH COUNTRY SEMI-WEATHERING PURPLE

Varied shades of burgundy and purples with frequent inclusions of green. A percentage of these slates will weather to tones of buff and brown upon exposure to the elements over time.

NORTH COUNTRY UNFADING MOTTLED PURPLE & GREEN

Dynamic shades of purple with frequent clouds or inclusions of green throughout each piece. A full range of dark mottled (predominantly purple with inclusions of green) and light mottled (some pieces primarily green with inclusions of purple) can be expected.

NORTH COUNTRY UNFADING GREEN

One of the most popular roofing slates ranging from light to dark green with subtle gray/green shades.

NORTH COUNTRY SEMI-WEATHERING GRAY/GREEN

Green or gray/green when quarried, a percentage of these slates will weather to tones of buff, brown and tan upon exposure to the elements over time.

NORTH COUNTRY MULTI COLORED CUSTOM BLEND

Select a custom blend of North Country Slate colors to create a truly unique roof. Random width slates are normally utilized, in combination with unfading and / or semi-weathering slates, to soften the transition from color to color on the roof.

“Slated for excellence”

Quarried in North America,
you will have the 100 Year Roof.
